

Conservation Commission

March 9, 1998

Members present: Richard Andrus, Richard Nault, Chris Blair, David Dempsey, Connie Ohman, Ray Tryon

RDA Ginsberg: Marshall White made the presentation for Ginsberg. Chris Blair announced a conflict. The project is a septic system. Some trees will have to be cleared. There is a 2" force main, 4" soil pipes, there will be a liner to minimize the size of the field. There doesn't appear to be an alternative. David Dempsey is in charge of the case. Determination N3.

Paul Sullivan for Corpruel. Craig Okerstrom .

Lang also represented the applicant. There is no filing for this project yet. They want to plant trees to replace trees that waere destroyed by the tornado. They want to plant laurel. Thin out what is in front of the house. It is seeded now with conservation mix. They are planting 30 trees. There will be no clear cutting. CO advised that the pruning and clean up of limbs in not a problem, for anything else they will need an abbreviated NOI.

Meeting adjourned 9:00

A handwritten signature in cursive script, appearing to read "Mary Ellen".
